## PROFILE

7+ years of experience in Enterprise Application product development. Solid background in advanced JavaScript methodologies, developing reusable UI components and robust user interfaces. Adaptable to a wide range of computer technologies and a strong desire to learn new ones. Ability to build and contribute applications with the latest technologies.

## EXPERIENCE

### Specialist-Software Engineer @ LTIMindtree - (Full-Time)  Present

Dec 2021 - Present

Bengaluru, Karnataka, India · Hybrid

> Worked on the global multi-brand e-commerce Web application. My key responsibility is to translate the design system into a seamless user interface by using Next js
> Built reusable & themeable react components in the storybook to reduce code duplication.
> Actively worked on user engagement programs such as Loyalty and referral programs.
> Collaborated with Product owner and Frontend Architect team and provided excellent suggestions for new features development.
> Performed unit tests by using jest/vitest to maintain 80% code coverage in the Sonarqube
> Reviewed peer developers' code and enforced them to follow the best coding practices.

Projects:  Blu/Pulze Vape Shop

### Senior Frontend Developer @ F22 Labs - (Full-Time)

Jan 2020 - Dec 2021

Chennai Area, India

> Worked on multiple e-commerce projects with multiple clients simultaneously.
> Built responsive web and mobile applications by using Next js, and React Native.
> Led the team, developed, deployed, and delivered applications in the most effective way.
> Actively involved in project management activities such as project road maps, project estimations & project plannings.
> Mentored junior developers by providing excellent tips & feedbacks to enforced them to follow the best coding practices.

Projects:  CheftoYourTable   JustAct   Wimple   Pixlmeet   Frankdarling

### Software Engineer @ Orion Business Innovation - (Full-Time)

Feb 2016 - Jan 2020

Madurai, Tamil Nadu, India

> Worked on large-scale sports ERP projects for the major Sports organization in Australia (NRL, AFL & MLB).
> Built reusable components for complex workflows by using Angular js and Angular.
> Coordinated with the team, developed, deployed, supported, and delivered applications effectively even in tight schedules.
> Primarily involved in Frontend development, later took Backend challenges as well with Java frameworks (JSP, Struts, Spring MVC, spring boot).
> Actively involved in project management activities such as project estimations and project plannings.
> Mentored junior developers and helped them to follow the best code practices.

Sports Projects:  Contracts   Salarycap   Safegaurd   Player trade   integrity
